Over millennia, Inuit lived, breathed, and ate near or from the ocean and lived in relative harmony with animals and seasons. Inuit language interweaves values and numerous words for elements of the ocean that are based on thousands of years of experience, knowledge, and observations. As Canada moves forward on increasing ocean literacy for all, integrating Inuit and Indigenous knowledge can not only improve literacy, it can be a path towards shared values in ocean and coastal management and protection. The experience of climate change in the Arctic makes this integration all the more urgent.

MARY SIMON OC, OQ
INUITS RIGHTS ADVOCATE
AND FORMER DIPLOMAT

Knowledge is power. As more Canadians learn about our changing oceans, we strengthen our collective ability to ensure they remain healthy. Healthy oceans have more to give – they feed more mouths, employ more people, and clean the air we breathe. I applaud the Canadian Ocean Literacy Coalition for their work on this important initiative. It is through projects like this that we get more people involved in our growing, sustainable Blue Economy, and deepen our understanding and our relationship to our oceans. That is what will empower Canadians to make choices that will keep our oceans thriving for generations to come.

HON. BERNADETTE JORDAN
MINISTER OF FISHERIES, OCEANS,
AND THE CANADIAN COAST GUARD

As a collaborating member since it began Ocean Networks Canada is delighted to become the administrative home of the Canadian Ocean Literacy Coalition. An initiative of the University of Victoria, Ocean Networks Canada supports Canadians from coast to coast to coast to #knowtheocean across science, society, and industry through ocean observing technology and data, for which ocean literacy is fundamental.

KATE MORAN
PRESIDENT & CEO
OCEAN NETWORKS CANADA

加拿大 Arctic Council 2021-2024

Department of Northern Affairs and Natural Resources, Canada

The Arctic Council (AC) is a unique forum for the governments of the Arctic States to work together on pan-Arctic issues, as well as imperative issues that are significantly affected by the Arctic. The AC has 14 members: the Arctic States, which includes Canada, Denmark (Greenland), Finland, Iceland, Norway, Russia, Sweden, and the United States; and the Permanent Participants, which are the indigenous peoples of the Arctic.

Canada’s Arctic Policy Vision 2019-2024 is a document that sets out the Government of Canada’s priorities and objectives for Arctic policies over the next five years. The vision is guided by the principles of the Canadian Constitution, including the duty to consult and accommodate, and the United Nations Declaration on the Rights of Indigenous Peoples.

The vision is based on four strategic priorities:

1. Building a Strong, Healthy, and Resilient Arctic Community
   - Investing in infrastructure and economic development
   - Protecting the Arctic environment and ensuring the health and well-being of Arctic communities
   - Supporting traditional knowledge and cultural practices

2. Supporting a Secure and Open North
   - Protecting and promoting international law
   - Supporting Arctic maritime and air transportation
   - Supporting Arctic research and innovation

3. Building Strong and Prosperous Arctic Communities
   - Supporting Arctic communities and their perspective on Arctic development
   - Supporting Arctic businesses and the development of the Northern economy

4. Empowering the Arctic’s People
   - Supporting Arctic communities and their perspective on Arctic development
   - Supporting Arctic businesses and the development of the Northern economy
   - Supporting Arctic communities and their perspective on Arctic development

The vision is also guided by the principles of the Canadian Constitution, including the duty to consult and accommodate, and the United Nations Declaration on the Rights of Indigenous Peoples.

1 **COLC**

A **COLC** (Canadian Urban Oil & Gas Collaborative) is a national, non-profit organization that brings together a diverse range of stakeholders to work collaboratively on issues related to the oil and gas industry in Canada. COLC's mission is to facilitate dialogue and collaboration among government, industry, and civil society to address the challenges and opportunities associated with the oil and gas sector.

**Key Areas of Activity**

- **Research and Analysis**: COLC conducts research and analysis on key issues related to the oil and gas sector, including environmental impacts, community engagement, and economic development.
- **Outreach and Education**: COLC provides outreach and education on issues related to the oil and gas sector to a wide range of stakeholders, including policymakers, industry representatives, and the general public.
- **Community Engagement**: COLC works to engage communities affected by the oil and gas sector, providing tools and resources to help communities participate in decision-making processes.

**Funding and Support**

COLC is supported by a diverse range of organizations, including government agencies, industry associations, and civil society organizations. COLC's funding is secured through a combination of membership fees, grants, and other sources of income.

**Contact Information**

- **Website**: [www.colcoalition.ca](http://www.colcoalition.ca)
- **Email**: contact@colcoalition.ca
- **Phone**: 1-888-COLC-INFO (665-2466)

**Annual Reports**

COLC publishes an annual report that provides an overview of its activities and achievements throughout the year. The 2021 report is available on the COLC website, and there are plans to continue producing annual reports to provide transparency and accountability to stakeholders.

2 **C.O.A.S.T.**

C.O.A.S.T. is a national network of community-based organizations that work to improve the health and well-being of communities affected by the oil and gas sector. C.O.A.S.T. is a collaborative initiative that brings together communities, Indigenous organizations, and other stakeholders to address the challenges and opportunities associated with the oil and gas sector.

**Key Areas of Activity**

- **Community Engagement**: C.O.A.S.T. works to engage communities affected by the oil and gas sector, providing tools and resources to help communities participate in decision-making processes.
- **Research and Analysis**: C.O.A.S.T. conducts research and analysis on key issues related to the oil and gas sector, including environmental impacts, community engagement, and economic development.
- **Outreach and Education**: C.O.A.S.T. provides outreach and education on issues related to the oil and gas sector to a wide range of stakeholders, including policymakers, industry representatives, and the general public.

**Funding and Support**

C.O.A.S.T. is supported by a diverse range of organizations, including government agencies, industry associations, and civil society organizations. C.O.A.S.T.'s funding is secured through a combination of membership fees, grants, and other sources of income.

Canada's Achievements (2021-2024)

Canada's commitments to the SDGs are aligned with the UN Ocean Decade (2021-2024) and the Convention on Biological Diversity. The Government of Canada has committed to the Blue Economy Strategy and the Oceans Protection Plan. The Ocean Literacy Strategy is also aligned with the UN Ocean Decade and the Convention on Climate Change.

SDG Goals

1. No Poverty
2. Zero Hunger
3. Good Health and Well-being
4. Quality Education
5. Gender Equality
6. Clean Water and Sanitation
7. Affordable and Clean Energy
8. Decent Work and Economic Growth
9. Industry, Innovation and Infrastructure
10. Reduced Inequalities
11. Sustainable Cities and Communities
12. Responsible Consumption and Production
13. Climate Action
14. Life below Water
15. Life on Land

UN Framework Convention on Climate Change

UN Declaration on the Rights of Indigenous Peoples

Oceans Protection Plan

UN Ocean Decade (2021-2024)
Oceans can be a source of inspiration, beauty, and power. They are the lifeblood of our planet, providing food, water, and a habitat for countless species. However, they are also under threat from pollution, overfishing, and climate change. It is up to us to protect and preserve these precious resources for future generations.

Ocean conservation is a crucial issue that requires action at all levels. From individuals to governments, we all have a role to play in ensuring the health of our oceans. By making conscious choices, such as reducing plastic use and supporting sustainable fishing practices, we can help to protect the oceans and their inhabitants.

In conclusion, the oceans are more than just a resource to be used; they are a vital part of our planet's ecosystem that need our protection and care. Let us work together to ensure a healthy ocean for all.
Elaboració d'una estratègia per als campaments de pesca dels anys 2020-2030. 

La piràmide de l'ocupació, el ritme de creixement econòmic, la gestió de la pesca, el sector pesquera, la conservació i millora de les condicions de labor, etc. han estat els punts claus de les discusions. 

La piràmide de l'ocupació, el ritme de creixement econòmic, la gestió de la pesca, el sector pesquera, la conservació i millora de les condicions de labor, etc. han estat els punts claus de les discusions.
